Happy Days

An android application that promotes a healthy lifestyle for the citizens of New Westminster. The app accomplishes this by providing users with the ability to log their days in order to look back at the "Happy Days" when they are feeling down.

Technologies Used:

Java Android

Fresh Fridge

A mobile responsive web application built using Node/Express that aims to reduce food waste by allowing users to search recipes based on the food ingredients that are about to expire in their fridge.

Technologies Used:

Java

Android
